

WATER POLICY - 2018

OBJECTIVES

- To maintain water consumption at Moore's during 2018, at 2013 consumption levels
- The installation (as refurbishment / replacement opportunities arise) of more reliable, robust water saving devices

We intend to maintain these targets by:

- Installing water saving devices during the refurbishment of toilet facilities, or as identified
- The programme of installing waterless urinals within gent's toilets, during refurbishments, to be continued
- Publishing consumption figures for water
- Auditing 'washroom' facilities, undertaking remedial action as identified
- Identifying and repairing leaks, promptly
- Evaluating areas / implementing solutions where higher cost solutions are justifiable or where a policy decision is made
- Auditing water usage via meter billing and trend analysis

TIMESCALES

- Publishing water consumption figures - monthly
- Analysis of billing - ongoing
- Targets to be achieved by 31st December 2018

RESPONSIBILITIES

The Environmental & Quality Systems Manager will take responsibility for the above, allocating tasks and resources as appropriate.

M I Grainger
Environmental & Quality Systems Manager (Management Representative)
